we used it as an avenue to introduce spatial methods for image processing (Chapter 3), as well as the Fourier transform, the frequency domain, and image filtering (Chapter 4) Our purpose for introducing these concepts in the context of image enhancement (a subject particularly appealing to beginners) was to increase the level of intuitiveness in the presentation, thus addressing partially the

consistent theme, most of the examples in this chapter are related to image enhancement This is a good way to introduce spatial processing because enhancement is highly intuitive and appealing, especially to beginners in the field As will
